April 21, 1986

Reclassification of Class 'C' FM Facilities
Re: BC Docket 80-90

The rules adopted in BC Docket 80-90 (Report and Order adopted May 26, 1983, 94 FCC 2nd 152) specify a minimum ERP of 100 kW and a minimum HAAT of 300 meters for class 'C' facilities. Existing class 'C' facilities have until March 1, 1987 to meet these minimums or be reclassified to a lower class. This notice contains a list of those facilities which are below the minimums and the new classification which they will receive in March 1987, if there is no upgrade.

On April 11, 1986, the Commission adopted a Notice of Proposed Rule Making (MMB Docket 86-144) which proposes to allow stations to adjust their power and antenna height above average terrain as long as an INDEX number (calculated from the values of ERP and HAAT) is not exceeded. This public notice also lists the classification based upon the INDEX method. Those cases for which the reclassification based on the Docket 80-90 method and the INDEX method differ are marked with an '*'.

The list is arranged by channel number and then by state and city, and contains license, construction permit and application records in the Commission's FM Engineering Data Base as of April 11, 1986. The list contains all records for a facility if the classification of any one record changes due to either method. Stations which would not be reclassified are not listed.

Noncommerical educational facilities will also be reclassified on March 1, 1987. The separation distance requirements between noncommerical educational facilities on channels 218, 219, and 220 or noncommerical facilities separated in frequency by 10.6 or 10.8 MHz (53 or 54 channels) and allotments or assignments on the non-reserved channels will be based on these reclassifications and the distance obtained from Table A, B, or C (Section 73.207) as appropriate. For other non-commerical educational facilities, the reclasssification is for administrative purposes only.

This list is published for information purposes only. The inclusion or exclusion of any FM facility does not reflect a determination of any eventual class designation. The inadvertent exclusion of any FM facility from this list will not be grounds for an extension of the March 1, 1987, date.

Questions regarding this list should be directed to Gary Kalagian (202) 632-2049 or John Boursy (202) 634-6315.

(over)
