Report No.: IBFS-99-0001

February 10, 1999

International Bureau On-Line Reports and Electronic Filing Pilot Program

As part of its ongoing electronic filing initiative, the International Bureau announces the availability of on-line reporting services and the opening of an electronic filing pilot program. These new internet components of the International Bureau Filing System (IBFS) are the result of a 16-month effort to design and develop one automated system to aid in the processing of the variety of applications received by the Bureau, to allow electronic filing of applications to the Bureau and to increase public access to processing data.

Internet Reports

Beginning February 10, 1999, a variety of application processing reports are available to the public for the first time via the internet at <http://ibfswb.fcc.gov/webreports>, the IBFS homepage. Users may also access the IBFS homepage through links provided on the International Bureau's home page at www.fcc.gov/ib. The IBFS reports improve information services by providing up-to-the-minute data on applications and certain other requests filed with the International Bureau.

Links to reports are located in the bottom section of the IBFS homepage. IBFS provides 5 major categories of reports, including:

International Telecom

Satellite Earth Stations

Satellite Space Stations

International HF Broadcast Stations and Public Fixed Radio Stations

Other Reports

A detailed listing of reports available within each of the 5 major categories is attached to this notice.

IBFS reports are available to all users; however, the Bureau requests that users interested in filing applications via IBFS contact the IBFS Pilot Program Coordinator, Jacki Ponti, before creating an account and filing applications.

Questions and comments are welcomed and encouraged and can be submitted to the following IBFS contacts:

Jacki Ponti (202) 418-0436 jponti@fcc.gov
 John Mount (202) 418-0410 jmount@fcc.gov
 Alicia Smothers* (202) 418-1480
 (*for International Telecommunications Reports only)

Electronic Filing Pilot Program

On February 10, 1999 the International Bureau will begin a pilot program for electronic filing of applications through the IBFS system. The two-month pilot program is intended to begin the process of a transition to full electronic filing of applications received by the Bureau, and to gather suggestions for modification and enhancement of services provided through IBFS.

The IBFS system currently allows for the electronic filing of the following types of applications:

INTERNATIONAL TELECOMMUNICATIONS APPLICATIONS	EARTH AND SPACE STATION APPLICATIONS (Part 25)
International Accounting Rate Change Filings (Part 63)	Earth Station Authorizations - Form 312
Cable Landing License Applications (Part 63)	Earth Station Special Temporary Authority
Requests for assignment of a data network identification code (Part 64)	Renewal of Radio License in Specific Services
Foreign Carrier Affiliation Notification Filings (Part 64)	Space and Earth Station: Application for Modification of Current Authorization or Amendment of Pending Applications
International Section 214 Applications (Part 63)	Space and Earth Station: Applications for Transfer of Control or Assignment of License
International Section 214 Special Temporary Authority (Part 63)	Space Station Authorizations - Form 312
International Signalling Point Code Filings (Part 64)	Space Station Special Temporary Authority
Recognized Operating Agency Filing	

Members of the pilot program will receive training on the use of the IBFS system and assistance in filing applications through the system.

Parties interested in joining the IBFS Pilot Program should contact the IBFS Pilot Program Coordinator, Jacki Ponti at (202) 418-0436 or jponti@fcc.gov.

International Telecommunications Reports

1. All Cases Not on A.F.F.P.N.
This report lists Section 214 applications that have been filed with the Bureau, entered into the IBFS system, but not released on an Accepted for Filing Public Notice.
2. Accounting Rate Current Authorization Listing by Carrier
List all processed international accounting rate change filings (ARC) sorted alphabetically by carrier.
3. Accounting Rate Current Authorization Listing by Administration
List all processed international accounting rate change (ARC) filings sorted alphabetically by administration.
4. Accounting Rate Pending Listing by Carrier
List all pending international accounting rate change (ARC) filings sorted alphabetically by carrier.
5. Accounting Rate Pending Listing by Administration
List all pending international accounting rate change (ARC) filings sorted alphabetically by administration.
6. Data Network Identification Code Pending Application List
Lists all pending requests for data network identification codes (DNC).
7. Foreign Carrier Affiliation Notification Pending Application List
Lists all pending foreign carrier affiliation notification (FCN) filings.
8. International Special Projects Pending Applications
Lists all pending international special project (ISP) applications. ISP is a application type determined by the Commission.
9. International Telecommunications Pending Application List
Lists all pending Section 214 (ITC) applications.
10. Recognized Operating Agency Pending Application List
Lists all pending recognized operating agency requests.
11. Submarine Cable Landing Pending Application List
Lists all pending submarine cable landing license (SCL) applications.
12. SPC Assignment Listing for a Given State
Allows users to select a state and retrieve a list of all international signalling point code (SPC) assignments for that state.
13. ISPC Assignment Listing
Lists all international signalling point code (SPC) assignments.
14. ISPC Pending Application List

Lists all pending international signalling point code (SPC) applications.

Satellite Earth Station Reports

1. Pending Application List
Lists all pending Earth station applications.
2. Application Search Tool
Allows users to retrieve lists of applications (pending and completed) for a given state (site of the facility), application type and/or nature of service.
3. Current Authorization List by Licensee
Lists all current Earth station authorizations sorted in licensee order.
4. Current Authorization List by Callsign
Lists all current Earth station authorizations sorted in call sign order.
5. Current Authorization List by State and City
Lists all current Earth station authorizations sorted by the state and city of the site of the facility.
6. List of File Numbers for a Given Call Sign
This report allows users to enter a call sign and retrieve a list of all file numbers associated with that call sign.
7. VSAT Authorization List
Lists all current VSAT authorizations.
8. Selected Application by File Number
This report allows users to retrieve information on a specific application by entering its file number.

Satellite Space Station Reports

1. Pending Application List
Lists all pending space station applications.
2. Current Authorization by File Number
Lists all current space station authorizations sorted by file number.
3. Current Authorization by Callsign
Lists all current space station authorizations sorted by callsign.
4. Current Authorization by Licensee
Lists all current space station authorizations sorted by licensee.

International HF Broadcast and International

1. 325-C Pending Application List
Lists all pending Section 325-C (Permit to deliver programs to foreign broadcast stations) applications.
2. IHF Pending Application List
Lists all pending International High Frequency Broadcast (IHF) applications.
3. IHF Current Authorizations by File Number
Lists all current International High Frequency Broadcast (IHF) authorizations sorted in file number order.
4. IHF Current Authorizations by Expiration Due Date
Lists all current International High Frequency Broadcast (IHF) authorizations sorted in expiration due date order.
5. IPF Pending Application List
Lists all pending International Public Fixed Radio (IPF) applications.
6. IPF Current Authorizations by File Number
Lists all current International Public Fixed Radio (IPF) authorizations sorted in file number order.
7. IPF Current Authorizations by Callsign
Lists all current International Public Fixed Radio (IPF) authorizations sorted in callsign order.

Other Reports

1. Selected Application Status
This report allows users to enter a file number and returns that application's processing status.
2. Condition and Provision Text Listing for a Given Condition Code
Users may enter a specific condition code from a license or authorization and retrieve the full text of the condition.
3. Condition and Provision Text Listing for a Given Subsystem
Users select a subsystem (i.e., ITC, SES, SAT, etc.) and retrieve the full list of conditions and provisions associated with that subsystem.
4. Condition and Provision Text Listing by Code Number
This report lists all conditions and provisions assigned to licenses or authorizations sorted by their code numbers.
