DA 96-368

Released: March 15, 1996

AUDIO SERVICES DIVISION INFORMATION AVAILABLE ON THE INTERNET

The Mass Media Bureau's Audio Services Division World Wide Web page on the Internet will be available beginning today. The Web page features the following information:

- Status reports for pending and blocked applications for construction permits to modify the facilities of AM and FM full service stations and FM Translators. From these reports, applicants can determine their "place in line" for processing. The reports will be updated on the first and fifteenth of each month.
- Telephone numbers to call for status information about any type of pending application.
- A database that can be queried on-line using the station's call sign to obtain technical information about any full service FM or FM Translator station. The technical data is obtained from the Commission's FM engineering database and will be updated daily.
- Beginning April 8, 1996, staff decision letters of general interest.

The Audio Services Division Web page can be accessed from the Audio Services Division link on the Mass Media Bureau's Web page. The Mass Media Bureau's page can be accessed directly at <http://www.fcc.gov/mmb.html> or by following the Mass Media Bureau link on the Commission's main Web page at <http://www.fcc.gov>.

For suggestions or comments regarding the Audio Services Division Web page, please contact Tony Amoroso (aamoroso@fcc.gov) at (202) 418-2740 or William Ball (wball@fcc.gov) at (202) 418-2670. For questions regarding the FM engineering database, please contact Gary Kalagian (gkalagia@fcc.gov) at (202) 418-2789.

By: Acting Chief, Audio Services Division
