

PUBLIC NOTICE

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

July 17, 1945

SUPPLEMENT TO THE STATEMENT OF POLICY ISSUED ON JANUARY 16, 1945
CONCERNING APPLICATION TO MAKE CHANGE IN EXISTING RADIO FACILITIES

Since the outbreak of war, due to the unavailability of materials and equipment, the Commission in licensing standard broadcast stations has found it necessary in some cases to permit operation with facilities that were not in full accordance with the Standards of Good Engineering Practice. In such instances a conditional clause was inserted in the license requiring the licensee, when equipment and materials become available, to apply for a change in facilities such as moving to a new site, installing frequency and modulation monitors, increasing its power or installing a new antenna.

The Commission is now in receipt of advice from the War Production Board that material and equipment are presently available or will shortly become available, for the construction contemplated by these conditional clauses. Accordingly, the Commission will direct each licensee in this category to make appropriate application for the necessary improvements specified in the license within 30 days of this date, except:

- (1) Where frequency monitor or modulation monitor is required,
- (2) Where two stations are operating with a common antenna or from a joint studio.
