PUBLIC SAFETY AND HOMELAND SECURITY BUREAU SEEKS COMMENT ON REGION 5 (SOUTHERN CALIFORNIA) 700 MHZ REGIONAL PLAN AMENDMENT

PS Docket No. 06-229 and WT Docket No. 02-378

Comments Due: May 11, 2009

Reply Comments Due: May 20, 2009

Introduction. On February 17, 2009, the Region 5 (Southern California)¹ 700 MHz Regional Planning Committee (RPC) submitted a proposed modification (Plan Amendment) to amend its 700 MHz Public Safety Plan² for General Use spectrum in the 769-775/799-805 MHz band.³ The Plan Amendment provides the following modifications:

- Revises the frequency allocations to align the border agency allocations to the current U.S. – Mexico agreements in the 700 MHz band.
- Revises the allocations for County of Riverside (Riverside) by providing additional channels for implementation of an entirely new radio system on the 700 MHz General Use channels thereby permitting Riverside to vacate its 800 MHz licensed channels to facilitate rebanding⁴ in Southern California.

¹ The Region 5 (Southern California) 700 MHz regional planning area consists of ten counties: Imperial, Los Angeles, Orange, Riverside, Santa Barbara, San Bernadino, San Diego, Kern, San Louis Obispo and Ventura.

² See Letter from David Buchanan, Chair, Region 5 700 MHz Regional Planning Committee, to Marlene H. Dortch, Secretary, Federal Communications Commission, WT Docket No. 02-378 (filed Feb. 17, 2009) (Plan Amendment). The Region 5 Plan was initially approved in April 2004, and amended in June 2008; see Region 5 (Southern California) 700 MHz Regional Committee Proposed Public Safety Plan, Development of Operational, Technical and Spectrum Requirements for Meeting Federal, State and Local Public Safety Agency Communication Requirements through the Year 2010, WT Docket No. 02-378, WT Docket No. 96-86, *Order*, 19 FCC Rcd 8110 (WTB-PSCID 2004); Public Safety and Homeland Security Bureau Approves Region 5 (Southern California) 700 MHz Plan Amendment, WT Docket 02-378, PS Docket No. 06-229, *Public Notice*, 23 FCC Rcd 8759 (PSHSB 2008).

³ The General Use spectrum is administered by regional planning committees (RPCs) and is licensed for public safety services on a site-by-site basis in accordance with the relevant Commission-approved regional plan and frequency coordination.

⁴ Rebanding of the 800 MHz band is governed by procedures established by the Commission in WT Docket 02-55: Improving Public Safety Communications in the 800 MHz Band.

The proposed Plan Amendment was reviewed by, and letters of concurrence obtained from, all three regions adjacent to Region 5: Region 3 (Arizona); Region 6 (Northern California); and Region 27 (Nevada).⁵

Background. In 1998, the Commission established a structure to allow regional planning committees (RPCs) optimal flexibility to meet state and local needs, encourage innovative use of the spectrum, and accommodate new and as yet unanticipated developments in technology and equipment.⁶ There are fifty-five RPCs, and each committee is required to submit its plan for the General Use spectrum.⁷ The Commission's role in relation to the RPCs is limited to (1) defining the regional boundaries; (2) requiring fair and open procedures, *i.e.*, requiring notice, opportunity for comment, and reasonable consideration; (3) specifying the elements that all regional plans must include; and (4) reviewing and accepting proposed plans (or amendments to approved plans) or rejecting them with an explanation.⁸

On July 31, 2007, the Federal Communications Commission (Commission) adopted a *Second Report and Order* revising the rules governing wireless licenses in the 700 MHz band.⁹ The Commission adopted a plan for the 700 MHz band to establish a nationwide, interoperable public safety broadband communications network for the benefit of state and local public safety users. The Commission designated the lower half of the 700 MHz public safety band for broadband communications (763-768/793-798 MHz) and consolidated existing narrowband allocations in the upper half of the public safety 700 MHz band (769-775/799-805 MHz).
