PROPOSAL FOR THE WORK OF THE CONFERENCE

Agenda Item 4: in accordance with Resolution **95 (Rev.WRC-2003)**, to review the Resolutions and Recommendations of the previous Conferences with a view to their possible revision, replacement or abrogation.

Background: Resolution **33 (Rev. WRC-03)** contains procedures to be applied for the coordination and notification of BSS satellite networks for which the API has been received by the Radiocommunications Bureau prior to 1 January 1999.

The BR Director's review of Resolutions and Recommendations of WARC/WRC, submitted to the last meeting of the CPM, proposed that WRC-07 suppress Resolution **33 (Rev.WRC-03)** under the justification "Processing of filings under this Resolution completed".

However, some countries still have BSS filings in the process of coordination and notification in accordance with the terms of Resolution **33 (Rev. WRC-03)**. These filings have been submitted under **11.43A** and are covered by an API submitted prior to 1 January 1999. Moreover, their validity extends well beyond 2007.

Proposal:

USA/ /01 NOC

RESOLUTION 33 (Rev.WRC-03)

**Bringing into use of space stations in the broadcasting-satellite service,
prior to the entry into force of agreements and associated plans for
the broadcasting-satellite service**

Reasons: Suppression of Resolution **33 (Rev. WRC-03)** by WRC-07 is not appropriate because it will modify in mid-course the coordination and notification procedures applicable to certain filings still in process within the ITU.
