K. Measuring Effective Utilization of 911/E911 Fees

- 1. Please provide an assessment of the effects achieved from the expenditure of state 911/E911 or NG911 funds, including any criteria your state or jurisdiction uses to measure the effectiveness of the use of 911/E911 fees and charges. If your state conducts annual or other periodic assessments, please provide an electronic copy (e.g., Word, PDF) of the latest such report upon submission of this questionnaire to the FCC or provide links to online versions of such reports in the space below.**

The North Carolina 911 Board completed the rule making process to established administrative rules for the Primary PSAPs that receive 911 funding. The effective date of those rules was July 1, 2016. In anticipation of assessing individual PSAPs after the rules become effective, the Standards Committee of the NC 911 Board has developed an assessment tool to assist PSAP managers. Peer review assessment teams are expected to begin PSAP compliance visits in 2017.

The NC 911 Board utilizes the Electronic Call Analysis Tracking System (ECaTS) to measure individual call answer times by PSAP. In January 2014, 33% of the PSAPs (42) did not meet the 10 second answer time of 90% of all 911 calls. In December 2014, that number had decreased to 23%. In December 2015, that number had decreased to 8.2%. In December 2016, there was a slight increase to 8.69%. This increase of .5% is not worrisome but it does bear watching. Better training, better equipment and more attention to performance is still given as a direct result of 911 funding. With the peer review program starting in 2017, call answer times is one of the focal points in the assessment and will certainly create more attention.

2016 PSAP Answer Time	Answer Times In Seconds
