

Portland General Electric  
700 MHz A Block Licensee  
February 10, 2017

2017 Annual Report

Pursuant to Section 27.607 of the Commission's Rules, Portland General Electric (PGE), a licensee of four A Block licenses in the 700 MHz guard band, hereby provides this Annual Report on the status and use of these licenses.

PGE currently has no lease agreements in place for the subject licenses.

PGE intends to use the spectrum for land mobile radio, mobile data, and fixed data services to support electric utility operations in the states of Oregon and Washington. We will not be providing commercial wireless communications services. The spectrum governed by these licenses will be used to serve internal PGE business units. We are currently in system design and technology evaluation phases. We anticipate beginning construction in late 2017 or early 2018 and being substantially built by the end of 2018.

Please let me know if you require additional information.

Respectfully,

Michael Wagner  
Portland General Electric  
10800 SW Avery St  
Tualatin, OR 97062  
503-464-8000
