

**700 MHz Guard Band Manager Report
Harbor Guardband, LLC
Second Annual Report
February 23, 2004**

In response to the request by the Wireless Communications bureau, Harbor Guardband, LLC, submits the following information as its 2004 band manager report:

1. Call sign and market area: WPRV425, Alaska MEA Block B
2. Total number of spectrum users: 0
3. Number of spectrum users that are affiliates of Guard Band Manager: 0
4. The amount of spectrum being used: 0
5. General nature of its customers' spectrum use: N/A
6. Length of Term of each user agreement: N/A

As of February 23rd, 2004, there were no users or operations in Harbor's licensed frequencies. Harbor has been working with fellow licensees and vendors to identify potential applications for its Guard Band license. Among other obstacles Harbor has faced, uncertainties regarding the digital television transition and associated clearing of the 700 MHz band has caused delays among vendors in developing equipment for both public safety and commercial users in the 700 MHz band.

More significantly for the Guard Band, continued delays in resolution of the spectrum swap proposed by Nextel, which holds the largest number of 700 MHz Guard Band licenses, has caused uncertainty over future use of all Guard Band licenses. Harbor described some of its concerns regarding the Nextel proposal in detail in comments filed with the Commission on February 10, 2003 (WT Docket No. 02-55).

Harbor Wireless believes equipment vendors will commit to significant development efforts in the 700 MHz band only after these uncertainties are resolved. In the meantime, Harbor Wireless will continue to provide timely updates consistent with the reporting requirements.
