## Explanation of Effort and Availability of Commercial Equipment

\*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

BBCP staff is diligently working with fund administrators on 5640 modifications and submitting invoicing, we also appreciate the efforts made by FCC Fund Administrators that are assisting BBCP in completing this project in its entirety. We are also making every effort to secure alternative funding sources to cover budget shortfalls for approved Mavenir core.

\*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

We were able to find available equipment and struggled with supply chain delays early on. The struggle post covid is finding qualified professional services and tradesmen that have available time to work. When talking with my peers there is a consensus that our companies and supporting contractors have more work than ever before.

\* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.

Acquisition of the approved Mavenir Core is necessary, point-to-point encapsulated ethernet circuit transport costs connecting network to out of state hosted core services are not sustainable. Utilizing a VPN over the world wide web to transport traffic is not a long term option due to quality of service and high latency.
