Explanation of Effort and Availability of Commercial Equipment

*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

All covered equipment to be removed was delivered to disposal facility as scheduled and no problems with material inventories were reported by ATR. Also note BBCP changed the original tower construction contractor after installing only new antennas, radios, trunk lines and associated jumper at 8 sites. BBCP was able to find a credible construction contractor to complete the remaining sites installation, turn up and removals for all sites. Engineered drive testing was performed for system optimization and then final drive testing to prove system performance. BBCP has been in the process to update timeline and the 5640 cost estimates and when complete will begin submission of engineering, construction and disposal invoices as well as the final material reimbursement request for core.

*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

BBCP has been diligently working to find alternative funding to cover the unallocated approved costs for maverick core. Use of a hosted core was chosen as the only viable interim solution to provide for system turn up and disposal of covered equipment with budget shortfalls. This temporary alternative will be replaced due to high latency and high recurring costs to the company. The permanent core solution will accommodate future low latency requirements as well as a greater degree of reliability and dependability.

* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.

Project plan prioritized complete system build, testing, turn up, removals and subsequent disposal. E911 Phase 0 was operational prior to sites turned up, company has prepared for phase 2 E911 and waiting on request letters from area PSAP's to turn up. Initiating NG911 planning at this time, CMAS tested and operational. Changing PLMN Identification to BBCP intentionally delayed until month of January 2024 to accommodate engineering work load and schedule availability.
