**Re: Enhanced A-CAM Election Letter
Cable One, Inc. Provider ID 130183**

To Whom It May Concern:

Cable One, Inc. (“CABO” or “Company”) Provider ID 130183, hereby submits this letter notifying that it will elect the Enhanced Alternative Connect America Model (Enhanced A-CAM) support in Study Area Codes 240512, 240523, and 421882 in South Carolina and Missouri.

The Federal Communications Commission’s Wireline Competition Bureau (Bureau) released a Public Notice instructing rate-of-return carriers electing EA-CAM to file a letter via email by September 29, 2023 confirming that it “elects the Enhanced A-CAM support as specified in Report 1.1 released on August 30, 2023, and commits to satisfy the specific service obligations associated with that amount of model support, including both the deployment of 100/20 Mbps or faster service to all required locations and the maintenance of 100/20 Mbps or faster service to currently served locations.”¹ The Company requests that the FCC direct USAC to use actual 2022 CAF-BLS claims as reported on FCC form 509 due December 31, 2023 as opposed to estimated claims included in the order referenced above. If the FCC elects to use estimated CAF-BLS amounts, it will not change The Company’s election.

The Company hereby commits to satisfying the specific service obligations associated with that amount of model support that it is eligible to receive in South Carolina and Missouri, including both the deployment of 100/20 Mbps or faster service to all required locations and the maintenance of 100/20 Mbps or faster service to currently served locations. The location totals

¹ *Wireline Competition Bureau Announces Enhanced Alternative Connect America Cost Model Support Amounts Offered to Rate-of-Return Carriers to Expand Rural Broadband*, WC Docket No. 10-90 (rel. Aug. 30, 2023), DA 23-779 (Enhanced A-CAM Election PN). The Enhanced A-CAM Election PN also requires electing carriers to identify in their election letters the technology or technologies they plan to use to meet their Enhanced A-CAM deployment obligations and those with “mixed support” should explicitly acknowledge that the election applies to both their A-CAM and CAF BLS study areas.

and specific service obligations for each type of location are specified in the Excel workbook entitled “Enhanced A-CAM – A-CAM 2.6.0 – Report Version 1”, Report/Table 1.2.

The Company hereby notifies the Bureau that it intends to use fiber to the premises (“FTTP”) technology to meet its Enhanced A-CAM deployment obligations. In very limited instances, the Company may explore using alternative deployment technologies such as licensed fixed wireless meeting the FCC’s performance requirements if necessitated by individual circumstances. Those limited instances notwithstanding, the Company’s intention is to deploy primarily FTTP connectivity to all required locations.

Please contact the undersigned with any questions on the Company’s Enhanced A-CAM election described herein.
