

# DIALING MEXICAN TELEPHONE NUMBERS BECAME SIMPLER A YEAR AGO.

A less complicated dialing process implemented in **Mexico on August 3, 2019** to standardize Mexican phone numbers, made all of them **10 digits** long.

We had a coexistence period of one year to get used to the new dialing system, though, from **august 3** on, if you want to call to Mexico, prefixes will not be needed.

Mexico will no longer need the prefix 1 before the area code.

Dialing to a landline in Mexico, will remain the same way as now.
