Although we are soliciting comment on these issues, the EPA intends to continue the status quo with respect to the minimum data requirements reported to ICIS-Air at this time. We will consider any comments received as we evaluate potential future improvements to the integration of information collected via ICIS-Air and CEDRI. The anticipated burden requirements for the current minimum data requirements associated with ICIS-Air are as follows:

Respondents: State, Local, Territorial, Indian Nations, and Commonwealth governments.

Respondent’s obligation to respond: Mandatory (section 114(a)(1) of the Clean Air Act, 42 U.S.C. 7414(a)(1)).

Estimated number of respondents: 99.

Frequency of response: Every 60 days.

Estimated annual burden: 26,100 hours.

Estimated annual cost: $1,280,000.

There are no annualized capital/startup or operation & maintenance costs.

Changes in estimates: There is no anticipated change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to several considerations. First, the ICIS-Air reporting system and minimum data reporting requirements have not changed over the past three years. Second, there is no anticipated change in the number of respondents or the number of responses from the prior ICR, so there is likely no significant change in the overall burden. For this ICR renewal, EPA will use experience from the last three years to provide burden estimates that adequately reflect the actual burden. EPA will consider any comments received and will conduct consultation with delegated agencies that are use ICIS-Air. There are no capital/startup or operation and maintenance (O&M) costs associated with this reporting activity. There is likely a slight increase in costs, due to the use of updated labor rates. This ICR will use labor rates from the most recent Office of Personnel Management (OPM), 2022 General Schedule.
