The Dangers of Distracted Driving

The popularity of wireless devices has had some unintended and sometimes deadly consequences. An alarming number of traffic accidents are linked to driving while distracted, including the use of wireless devices while driving, resulting in injury and loss of life. The national statistics are sobering:

- 9 people are killed and more than 1,000 are injured daily in incidents reported as distraction-affected crashes in the United States.
- According to the National Highway Traffic Safety Administration, more than 2,800 people were killed as a result of distracted driving in one year alone.
- An estimated 400,000 people were injured in crashes involving distracted drivers in during the course of one year.
- The National Occupant Protection Use Survey reports that handheld cell phone use tends to be highest among 16-24-year-old drivers.

How can you help?

Give clear instructions – Give new drivers simple, clear instructions not to use their wireless devices while driving. Before new drivers get their licenses, discuss how taking their eyes off the road – even for a few seconds – could cause someone injury or even death.

Lead by example – No one should text and drive. Be an example for others and if you need to text or talk on the phone, pull over to a safe place. Set rules for yourself and others regarding distracted driving.

Become informed and be active – Tell family, friends and organizations to which you belong about the importance of driving without distractions. Take information to your kids’ schools and ask that it be shared with students and parents.

State laws

Currently there is no national ban on texting or using a wireless phone while driving, but state laws and fines are becoming more aggressive in efforts to thwart distracted drivers:

- 21 states, the District of Columbia, Puerto Rico, U.S. Virgin Islands and Guam banned all drivers from hand-held phone use while driving;
- 48 states, the District of Columbia, Puerto Rico, U.S. Virgin Islands and Guam banned texting while driving for all drivers;
- 39 states and the District of Columbia prohibits all cell phone use by novice drivers;
- 20 states and the District of Columbia prohibit school bus drivers from cell phone use while driving.
