Explanation of Effort and Availability of Commercial Equipment

*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

We have fully removed all of the covered Huawei equipment, and we have disposed of all Huawei Equipment. We have finished replacement of covered Huawei equipment but we are still working on a core network reconfiguration to rectify a design flaw in the installation and integration process that does not support a fully redundant Core design. This flaw in the design need to be rectified.

*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

Yes, we are finding that equipment and services are commercially available.

* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.

United has nearly completed the removal, replacement and disposal of the covered Huawei Equipment. We are still working on a Core network design flaw that prevents our Core Network from being fully redundant. During upgrades it requires a prolonged outage of all services. We are working to redesign and add additional hardware to the core design so that we can still prevent a prolonged outage. The outage would affect all Cellular, fixed wireless, roaming and 9-1-1 calls during upgrades for an extended period of time and needs to be addressed before this project ends.
