Explanation of Effort and Availability of Commercial Equipment

*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

All ZTE equipment has been shut down and removed from the data center. In December 2023, the non-ZTE network elements connected with ZTE network elements were disposed of. The remaining ZTE network elements were also disposed of on March 20, 2024.

*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

Worldcell has chosen Mavenir and Cisco to provide their 4G/5G-NSA network equipment. The deployment is underway and expected to be completed by the end of September 2024.

* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.

Mavenir is the telecom vendor for WorldCell's SCRP project and is responsible for providing the 4G/5G network elements. Conversely, Cisco is responsible for providing the IP network elements, including Routers, Firewalls, and Switches. As per Mavenir's project plan, the 4G/5G network will be ready for acceptance by the end of August. This delay will impact the subsequent deployment timelines, leading to a delay in the overall project schedule. Consequently, WorldCell has requested a 4-month extension to ensure that the new 4G/5G network is meticulously tested and commissioned so that high-quality commercial-grade services can be delivered to its commercial customers.
