

developing the human health hazard values including the selection and application of a read across using 1,2-DCA as an analog; on the benchmark response (BMR) for the hazard value chosen for the human health hazard value used for the acute, short-term and chronic exposure durations; and on the weight of scientific evidence and confidence for specific hazard endpoints of central nervous system (CNS) depression/sedation, degeneration/necrosis of olfactory mucosa and decreased sperm concentration.

- For environmental hazard for aquatic and benthic organisms, EPA has limited empirical toxicity data available for 1,1-DCA and has employed an approach for developing the environmental hazard values through read across using a method for analog selection. EPA used 1,2-DCA and 1,1,2-trichloroethane as analogs to read across environmental hazard to 1,1-DCA. EPA is seeking comment on the use of analog data in combination with 1,1-DCA data to estimate risk to aquatic vertebrates and invertebrates, including benthic invertebrates.

- EPA obtained primary inhalation exposure monitoring data for 1,1-DCA for the occupational exposure scenario (OES) of Manufacture through a test order and prioritized the use of occupational inhalation monitoring data for the intended condition of use and other appropriate exposure scenarios (e.g., Processing as a Reactant and Laboratory Use OESs). EPA is seeking comment on the use of inhalation exposure monitoring data for these analogous exposure scenarios.

- EPA used surrogate chlorinated solvent inhalation monitoring data to estimate occupational exposures for the OES where there was a lack of inhalation monitoring data and applied a vapor pressure correction factor to account for vapor pressure differences between the surrogate chemical and 1,1-DCA. EPA is seeking comments on the use of surrogate data to estimate occupational exposures.

- For dermal exposures, EPA lacked specific 1,1-DCA dermal absorption data. Therefore, EPA used the Dermal Exposure to Volatile Liquids Model (DEVL) and applied the model to all OES; however, values for fraction absorbed and weight fraction of the chemical can differ among OES. EPA is seeking comments on the application of DEVL to all OESs and is seeking methods to better differentiate the dermal exposure potential and the resulting risks between OES.

C. How can I access the documents submitted for this letter peer review?

EPA is planning to release the draft risk evaluation for 1,1-DCA, all background documents and related supporting materials in the spring of 2024. At that time, EPA will publish a separate document in the **Federal Register** to announce the availability of and solicit public comment on the materials and provide instructions for submitting comments. The materials will be available in the docket and through the TSCA Scientific Peer Review Committees website. In addition, as additional background materials become available (e.g., list of experts participating in this letter peer review), EPA will include the additional materials in the docket and through the website.

Dated: March 14, 2024.

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

Privacy Act System of Records

AGENCY: Federal Communications Commission.

ACTION: Notice of a modified system of records.

SUMMARY: The Federal Communications Commission (FCC, Commission, or Agency) proposes to modify an existing system of records, FCC/CGB-1, Informal Complaints, Inquiries, and Requests for Dispute Assistance, subject to the Privacy Act of 1974, as amended. This action is necessary to meet the requirements of the Privacy Act to publish in the **Federal Register** notice of the existence and character of records maintained by the agency. The Commission uses records in this system to handle and process informal complaints, inquiries, and requests for dispute assistance received from individuals, groups, and other entities. This modification makes various necessary changes and updates to accommodate new uses of the system to collect and maintain voluntarily provided demographic data and to publicly disclose anonymized or de-identified complaint data.

DATES: This modified system of records will become effective on March 21, 2024. Written comments on the routine

uses are due by April 22, 2024. The routine uses in this action will become effective on April 22, 2024 unless comments are received that require a contrary determination.

ADDRESSES: Send comments to Brendan McTaggart, Federal Communications Commission, 45 L Street NE, Washington, DC 20554, or *privacy@fcc.gov*.

FOR FURTHER INFORMATION CONTACT: Brendan McTaggart, (202) 418-1738, or *privacy@fcc.gov* (and to obtain a copy of the Narrative Statement and the Supplementary Document, which includes details of the proposed alterations to this system of records).
